

# AVAILABLE MATERIAL STYLES

We can customize your curtains to what style and size you need.

Blackout Curtains are 100% blackout. Light cannot penetrate through our fire retardant curtains. It passes the NFPA 701 Small Scale Fire Test, one of the most rigid in the fabric industry, a flameproof certificate can be obtained on request.

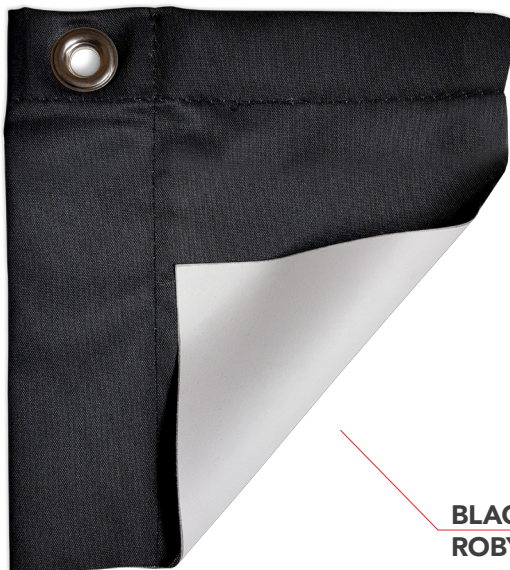

Blackout curtains have stainless steel grommets spaced 6" apart. Side seams and bottom seams are 1" double, with center seams also double sewn. Blackout Curtains are made 15% wider than the track size to allow for fullness.
